

AP End of the Year Options

1. Write an essay : 1). How did the exam this year go (what was easy for you and what was hard for you) also 2). about how you think AP Physics should be taught next year to aid the students the most (I will pass this onto next years' AP Physics teacher).
2. Kites (just go outside and fly kites on the practice football field for the fun of it).
3. Changing the world's calendar and why.
4. Time zones, why and how they work. (How many time zones are there?)
5. What's Up Doc's? (Bugs Bunny cartoons between what there is the most in the Universe to what there is the least of).
6. Potato guns (shooting golf balls out of homemade potato guns out on the practice field).
7. Clay puzzles to solve.
8. Building a antigravity device for a steely to take the longest to fall a given height.
9. GNATS (NIM game, MULT, Calculator Game, Instant Insanity game, Dimensions studied (video), MC Escher (video and books), Einstein's & Newton game...
10. Concave mirror lab.
11. Search internet for a cool lab to do.
12. Analyze parabolic motion with our own motion picture.
13. Get an engineer on skype still.
