

Instructor: P. Konichek Applied Calculus Section 4 M/T/W/R Noon – 12:50 pm Room CCC 111

Phone: (715) 346-2753 or cell (715)-323-3256 Email: pkoniche@uwsp.edu

Office Hours: SCI D357 – Mon, Tue, Thur: 10 am – 10:50 am (note #7 below)

Password to enter classroom: Positive 2nd Derivation Expression

Grade computation, Exams, Quizzes, Final Exam, Extra Credit, Attendance and Lateness, Right and Responsibilities, Tutoring, Important Dates, D2L, Calculating grade, Classroom Atmosphere, Quantitative Literacy Learning Outcomes, Homework, Text, Calculators are all the same as your last instructors, C. Scott, from your original course guide. (See smile2340.com MATH 111 or D2L)

Additions to Last Course Guide:

- 1). **We will have at least five GNATS** (Go Now And Teach Someone) where you become the teacher to at least two other individuals (roommate, family, friends, anyone not in our class that day it is taught) and share an unbelievably cool math concept/game. I hope to get them in the last 13 minutes on quiz days so you'll have to stick around for the life changing experience. These are extra credit, up to 2 pts each so five of them together could replace your lowest quiz grade (not added to your top seven quiz grades at all). I hope you do them just for their educational value if you don't need the points.
- 2). **We will fill all the blackboards in the classroom** during the period. **You will be at the blackboard with your** classmates daily (except testing days).
- 3). **This means you are even more responsible to teach yourself outside class time as we will not read the notes or textbook in class; we will be doing problems at the blackboards.** Learn by doing and repetitiveness. You will not forget how to do and use Calculus the rest of your life just as you know how to keyboard and text.
- 4). **Use Kelsey W. our SI leader model student Monday 2pm Tuesdays 4pm & Wednesdays 6pm.** She has the teaching gift and knows her Calculus and how to help you to know it. Thanks K.W. for helping me get a 10/10 on Q5 from having attended your 6 pm session, with six other students from class, the night before the quiz. Note: I just found out that I am not allowed to attend any more of your sessions K.W.
- 5). **My webpage is smile2340.com** where you will find (under the first heading MATH 111) my solutions to homework, quizzes, and exams and other useful information that may help you. Feel free to browse my entire website if you like. I placed the entire hands-on lab orientated SPASH Physics program with videos, Astronomy videos, Newspaper Articles, and much much more.
- 6). **C. Scott's notes are still on D2L** and she asked that I not put them anywhere else so I erased them on my website. With help from an UWSP Information Technology professional, **your grades are now posted in D2L** so the site automatically throws out your two lowest quizzes and your lowest exam.
- 7). **I will usually be in my office from 9 am till almost class time M/T/W/H** but will leave for home shortly after class time except I hope to grade the quizzes/exams and post them immediately after you take them before leaving for home. **Please feel free to stop up and talk anytime.**
