

Konichek's Calendar

Advantages:

1. One calendar instead of 28 calendars
2. The year starts in spring as it used to for most of history
3. Sept. through Dec. back in correct # order
(meaning Sept. means 7, Oct. 8, Nov. 9, Dec. 10)
4. January means god of doorways & beginnings
5. February means god of purification, ends the year as it has for most of history.
6. One calendar would save hundreds of millions of \$'s.
7. Every day would fall on the same day of the week so July 4th always a SATURDAY, December 25th always a Friday, New Years day always a SUNDAY, my birthday always a Tuesday, etc.
8. Add one or two new leap year rules like the last time (1582 AD) the calendar was improved. The two new rules being every 3200 years skip the leap year and every 400,000 year have the leap year.

Disadvantages:

1. Two consecutive Sundays every year called the 1st Sunday of the year and the last Sunday of the year and on leap years it would just have a day called Leap Day and would go Sat., Last Sun. of the year, Leap Day, 1st Sun. of the year.
2. People born in JAN. and MAR. would have to swap month names.
